Karan Shah

9820735496 shahkaran2513@gmail.com karan-sunil-shah Karan-Shah-2513 codeforces.com/karanShah

Fourth Year Information Technology student with an ability to generate high quality code in C/C++, Java, JavaScript and Python who is fascinated by new Technology and eager to learn

Education

Bhartiya Vidya Bhavan's Sardar Patel Institute of Technology **Feb. 2021 – June 2024(exp)**
B Tech with specialization in Information Technology - CGPA: 8.67 *Mumbai, Maharashtra*

MHTCET - Maharashtra Health and Technical Common Entrance Test **Oct 2020**
State Level Entrance Exam - Rank 248/300k+ / 99.81%ile *Mumbai, Maharashtra*

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Database Management
- Computer Networks
- Software Methodology
- Security Operations
- Artificial Intelligence
- Computer Architecture

Experience

Deutsche Bank **June 2023 – July 2023**
Software Engineer Intern *Pune, Maharashtra*

- Contributed to the development of a Java Spring Boot application
- Collaborated seamlessly with the DevOps team to achieve project milestones and deliverables, ensuring a smooth integration of the application into the existing infrastructure
- Applied Agile methodologies to streamline project development, emphasizing adaptability and responsiveness to changing requirements
- Proactively identified and addressed open-source software (OSS) vulnerabilities, enhancing the security posture of the application
- Maintained a commitment to code quality by producing clean, well-documented code, achieving 0 Sonar issues and implementing thorough test coverage

Projects

Decentralised Web Meetings with Code Collaboration | *NodeJS, IPFS, Socket.io, React, Tailwind* **Feb 2023**

- Developed a cutting-edge website enabling developers create decentralized meetings with real-time code collaboration
- Integrated QuillJS and sockets for real-time collaborative code editing, similar to Google Docs.
- Leveraged Huddle01 for decentralized meetings, ensuring a secure and reliable environment
- Utilized Lighthouse IPFS (Interplanetary File System) for efficient storage of meeting files
- Dockerized the application for seamless deployment and scheduled a cron job to automatically update the website daily

Defensive Data Transfer | *AWS RDS, PostgreSQL, scp, OpenSSL, gzip, AWS EC2* **April 2023**

- Engineered a CLI solution to facilitate the secure transfer of large databases and files from local to cloud environments
- Implemented robust Public Key Infrastructure using OpenSSL, employing AES-CBC mode for data encryption and RSA for securing the AES key
- Conducted extensive testing with AWS RDS featuring PostgreSQL setup to ensure the reliability and security of the data transfer process

Restaurant reviews website | *MongoDB, ExpressJS, React, NodeJS* **July 2022**

- Through the website you can Add, Edit or Delete a review of restaurants
- Used MongoDB Atlas for storing reviews
- Used ExpressJS framework for building apis for the React Frontend

Data Structure Visualizer | *HTML, Javascript* **Dec 2021**

- Constructed a website aimed at aiding programmers in visualizing various data structures, including Heap, Binary Search Tree, Binary Tree, Stack, and Queue
- Data Structures covered include Heap, Binary search tree, Binary tree, Stack and Queue
- Utilized HTML canvas for an intuitive visualization of nodes and stacks

Technical Skills

Languages: Java, Python, C/C++, HTML/CSS, JavaScript, SQL, Solidity
Developer Tools: AWS, VS Code, IntelliJ IDEA, GCP, Android Studio
Technologies/Frameworks: React, NodeJS, ExpressJS, LaTeX, Linux, GitHub, JUnit,

Achievements and Activities

Winner *Best use of Huddle01 ETHGLobal 2023* **Feb 2023**
Most Innovative Solution *Barclays Data Stellar Hackathon* **April 2023**
Computer Society of India S.P.I.T *Part of the tech team* **April 2023**
Class Representative *Batch of 79 students* **Feb 2021 – Present**
